

URINALYSIS
INFORMATION

PREGNANT PATIENTS

If a pregnant patient has any symptoms of a urinary tract infection (UTI):

1. Pain passing urine
2. New or increased frequency of passing urine (more often than usual)
3. Cloudy urine

Please leave a urine sample in to surgery for testing.

Expect a prescription for an antibiotic from the GP following testing.

MEN WITH URINARY SYMPTOMS

If a male patient has any symptoms of a UTI:

1. Pain passing urine
2. New or increased frequency of passing urine (more often than usual)
3. Cloudy urine

Please leave a urine sample in to surgery for testing.

Expect a prescription for an antibiotic from the GP following testing.

VISIBLE BLOOD IN URINE

All patients who notice visible red blood in their urine need to:

1. Leave a urine sample in to surgery for testing.
2. Make a telephone appointment with the GP or nurse practitioner as a priority.
